REINFORCED

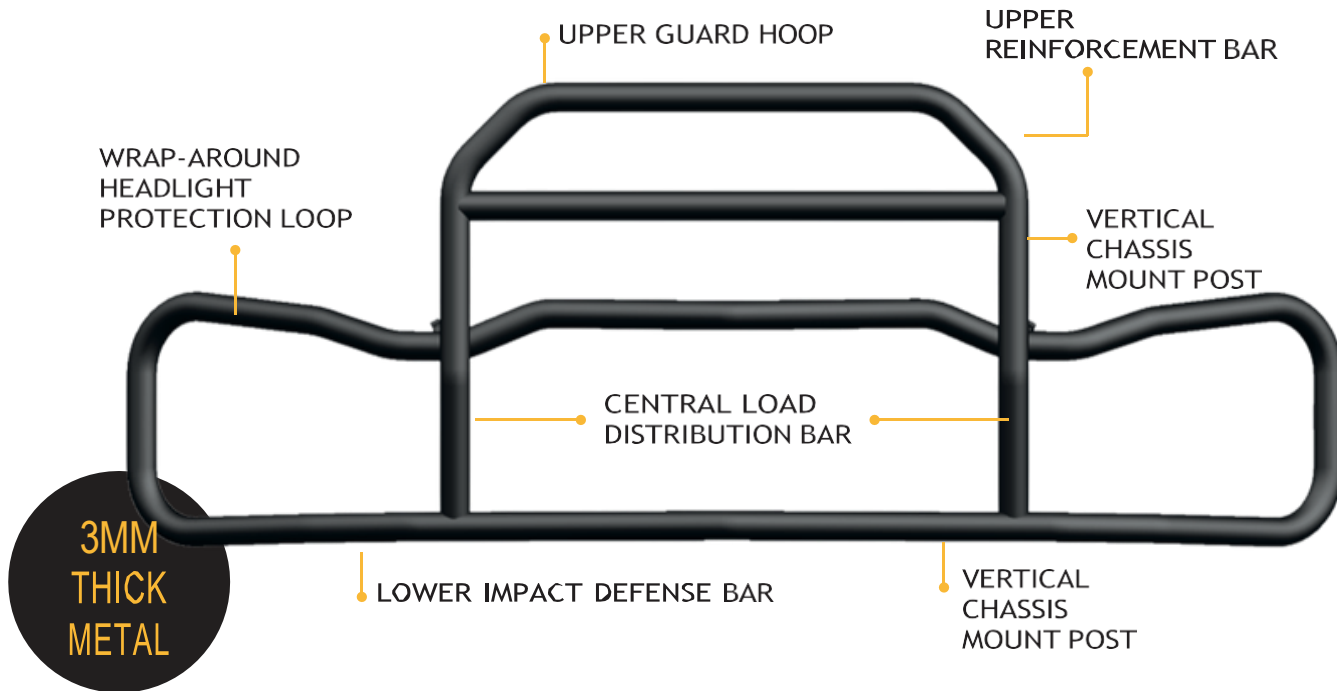

FRONT IMPACT PROTECTION

Front-end collisions and wildlife strikes are among the most unpredictable and expensive risks in heavy-duty transport. Engineered specifically for FREIGHTLINER CASCADIA models, this grille guard system delivers reinforced protection across the truck's most exposed impact zones. Its heavy-wall tubular steel design creates a rigid outer shield that helps deflect obstacles away from vital components such as headlights, grille assemblies, radar units, and bumpers. By absorbing and redistributing collision forces, the system reduces the likelihood of critical damage—keeping trucks on the road and out of the repair bay.

FREIGHTLINER

With Bracket Set Deer Animal Moose Guard Bumper

CASCADIA BLACK

CODE 20-613 PRODUCT WEIGHT 138 LBS

- » **Look like original** part of your Vehicle
 - » Protect your truck against road hazards.
 - » **Minimizes** the damage done to your truck and your wallet
 - » **No Drilling** or Front End Modification is necessary
 - » **Includes Necessary** Mounting Brackets and Hardware
 - » **Easy Installation**
- We produce.** You can write for wholesale purchases
- The product** has a covered by **5 mm** plastic skin

Designed, fabricated, welded, and finished in TÜRKİYE
